

## Features

- Adjustable Height from 24" - 40"
- Outriggers
  - Non-skid Rubber Feet for Off-Snow Applications
  - Increased Stability
- Reconfigurable
- Portable
- Stores Flat
- Ships UPS Ground!

## Specs

1. Double Barrel Design
2. Angled Entry and Exiting Ends
3. 2" Round Steel Coping
4. Powder Coated Finish
5. Stainless Steel Hardware

## Grow It - Kink It - Pimp It

The modular system makes it possible to fully customize your rail:

- **Grow It** - with 8' Flat Extensions
- **Kink It** - with Hinged connections
- **Pimp It** - with LED Light Kit
- **Personalize It** - with custom banners

SNOWatHOME® has created the first and only patent pending jib rail system that is fully expandable, adjustable and portable for snowboarders and freeskiers. We designed it to be strong, stable, smooth, for all skill levels, and able to adapt to any terrain. Built to professional standards, SNOWatHOME® makes backyard terrain parks a safe, convenient and a legitimate option for practicing at home. Newbies drop it to the ground and learn to grind. As they gain confidence - put the legs on, adjust the height and learn to transition from a kicker to the rail. More skilled riders can kink the rail with the patent pending hinge and grow the length with 8 foot flat extensions. They'll never get bored with the limitless layouts they can create. The best part is, you are never stuck with just one design! These systems are modular - move it around and put it back together in new ways. Counterseasonal use makes an easy transition to the skateboard and bmx markets.
